

Dental CE Accreditation Pack

Credit sought: Dental CE — ADA-CERP, via UCSF School of Dentistry **Audience:** Dental hygienists, dentists, and the dental team **Provider / platform:** OVN Nexus (ovnnexus.com) — education platform of Gengyve USA; credential issued by Amadeo Labs (research/certification arm, independent of the product brand) **Date prepared:** 2026-07-01

Course director & faculty

S. Thaddeus Connelly, DDS, MD, PhD, FACS — Full Professor at the University of California, San Francisco; founder of the oral-systemic platform Gengyve; co-founder of Boutique Venture Partners; collaborator on major grants; expert in the oral-systemic connection, pain, cancer, and TMD.

Faculty disclosure & mitigation: Dr. Connelly is the founder of Gengyve USA and has a financial interest in the company. His academic affiliation is listed for biographical context and does not represent institutional endorsement. The courses name no product and recommend none; every clinical claim is graded on a published three-tier evidence standard and reviewed for freedom from commercial bias. No commercial support funded development.

The dental-CE offering — a two-tier ladder

Course 1 — Foundations in Oral-Systemic Health (*entry; live*)

- **Format:** online, asynchronous, self-paced · ~3.0 contact hours
- **Audience:** dental hygienists, dentists, and staff (also carries medical CME for physicians)
- **Structure:** 9 evidence-tiered lessons; capstone reframes the oral exam for the medical History & Physical
- **Assessment:** 22-question final exam, 70% to pass, certificate on completion
- **Learning objectives:** explain how periodontitis generates measurable systemic inflammatory tone; diagram the Oral-Vascular-Neural axis and classify claims by evidence tier; describe keystone-pathogen dysbiosis and the OMV cascade; summarize the oral-vascular/neural/metabolic links in tier-correct language; execute defensible clinical actions and draft a co-management letter.

Course 2 — Certified Oral-Systemic Hygienist (COSH) (*Tier 2; async core built*)

- **Format:** 120-hour **blended** certification — asynchronous online core (~10 hrs, built) + two in-person weekend intensives at UCSF + a proctored final assessment
- **Audience:** RDHs who hold Foundations (also open to RDAs and dentists)

- **Structure:** 10 units on a retrograde clinical pedagogy — the collapse, systemic cascade, immune architecture, microbial network, mucosal barrier, risk stratification & chair-side biosensor interpretation, motivational interviewing, PCP/cardiology co-management, instrumentation as systemic medicine, and measurement/feedback
 - **Competencies:** risk stratification; chair-side biosensor interpretation; motivational interviewing for systemic behavior change; co-management protocols with physicians
 - **Assessment:** 20-question knowledge exam (80% to pass) + case portfolio + proctored final at the intensive; recertification at 24 months
-

Evaluation instrument (post-course, accreditation requirement)

Learners complete a post-activity evaluation: (1) the activity met its stated learning objectives; (2) the content was free of commercial bias; (3) I can apply what I learned at the chair; (4) what one change will you make in practice? (*outcomes measure*)

Evidence standard

All content is graded on a published three-tier system — **Established** (safe to cite), **Supported** (hedged language), **Hypothesis** (research framing only). Cardinal rule, stated throughout: periodontitis is **not** presented as a proven causal driver of cardiovascular disease, cancer, or Alzheimer's disease. Primary references available on request.

Accreditation pathway

Dental CE — ADA-CERP, via UCSF School of Dentistry, for hygienists, dentists, and the dental team. Foundations is the entry activity; COSH is the 120-hour clinical certification. (*A Tier-3 research fellowship, FIOM, sits above COSH for clinical leaders.*)

Full course materials, learning objectives, assessment, item bank, and faculty CV available on request.
