

Medical CME Accreditation Pack

Credit sought: Medical CME — ACCME / AMA PRA Category 1 (via UCSF Office of CME and/or the VA) **Audience:** Physicians and medical trainees (primary care, cardiology, geriatrics, and others) **Provider / platform:** OVN Nexus (ovnnexus.com) — education platform of Gengyve USA; credential issued by Amadeo Labs (research/certification arm, independent of the product brand) **Date prepared:** 2026-07-01

Course director & faculty

S. Thaddeus Connelly, DDS, MD, PhD, FACS — Full Professor at the University of California, San Francisco; founder of the oral-systemic platform Gengyve; co-founder of Boutique Venture Partners; collaborator on major grants; expert in the oral-systemic connection, pain, cancer, and TMD. Directs the History & Physical course at the SFVAMC.

Faculty disclosure & mitigation: Dr. Connelly is the founder of Gengyve USA and has a financial interest in the company. His academic affiliation is listed for biographical context and does not represent institutional endorsement. The courses name no product and recommend none; every clinical claim is graded on a published three-tier evidence standard and reviewed for freedom from commercial bias. No commercial support funded development.

The medical-CME offering

Course 1 — Foundations in Oral-Systemic Health (*live*)

- **Format:** online, asynchronous, self-paced · **~3.0 contact hours**
- **Structure:** 9 evidence-tiered lessons; the capstone, "Put the Mouth Back in the History & Physical," reframes the periodontal exam as a graded index of systemic inflammatory exposure
- **Assessment:** 22-question final exam, 70% to pass, certificate on completion
- **Physician-relevant objectives:** interpret periodontal staging as a systemic-exposure reading; order and interpret hs-CRP/IL-6 in co-management (with the ~20–30% post-therapy expectation); operate a two-question intake and a 3–6 month re-measurement loop; communicate risk in tier-matched language without causal overclaim

Course 2 — Dentistry for Doctors (*physician-facing companion; in development*)

- **Format:** online, evidence-tiered · six modules · **~2.0 contact hours (est.)**

- **Premise:** the oral exam and oral-systemic essentials for physicians who were never taught them — "put the mouth back in the H&P" in an afternoon
 - **Modules:** the exam medicine skips · reading the mouth as a dosimeter · stage → systemic risk → action · biomarkers in co-management · the two-question intake + the co-management loop · saying it right (three cases through the evidence-tier filter)
 - Shares Foundations' faculty, evidence standard, assessment model, and evaluation instrument
-

Evaluation instrument (post-course, accreditation requirement)

Learners complete a post-activity evaluation: (1) the activity met its stated learning objectives; (2) the content was free of commercial bias; (3) I can apply what I learned in practice; (4) what one change will you make in practice? (*outcomes measure*)

Evidence standard

All content is graded on a published three-tier system — **Established** (safe to cite), **Supported** (hedged language), **Hypothesis** (research framing only). Cardinal rule, stated throughout: periodontal therapy *improves inflammatory markers* (Established) but is **not** claimed to *prevent heart attacks or dementia* (Hypothesis). Primary references available on request.

Accreditation pathway

Medical CME — ACCME / AMA PRA Category 1, via the UCSF Office of Continuing Medical Education and/or the VA. Foundations is the interdisciplinary entry activity; Dentistry for Doctors is the physician-specific companion.

Full course materials, learning objectives, assessment, item bank, and faculty CV available on request.
